Valve Train Expertise

We are proud of our position as a world leader in heavy duty diesel valve guide supply, producing over 30,000,000 pieces yearly as a JIT OEM supply partner. We offer complete design in support of OEM objectives and emissions compliance. We are also an innovator in valve rotator design and functionality. Our patentable materials and designs include an environmentally conscious product that is re-buildable. This results in less waste and reduced costs.

Competencies

- Materials expertise in custom cast irons, powdered metal, bronze and heat treated valve guides
- Design & value engineering support for cost competitiveness
- Endurance & functional verification
- Analytical design methodology
- Production or service volumes
- Environmental enhancement with our reusable green design
